PROJECTS

Planet of Appetite: A website of a restaurant (07/2023 - 08/2023)

- Tech Stack: HTML,CSS,Javascript

Digital Clock using Arduino

- Digital clocks are mostly used as they are compact in size, more accurate and less power consuming. To understand the working of the digital clock we have created a digital clock using Arduino Uno in Tinkercad

FoodChat App with Chatbot

- In this project, we merging tech and food seamlessly. Our stack includes HTML/CSS frontend, Python/FastAPI backend, and a Dialogflow chatbot for effortless ordering.

WORK EXPERIENCE

Web Developer Infovue Solutions

10/2023 - 03/2024

Kolkata,India

Tasks

- In my role, I used PHP CodeIgniter and Laravel for both front-end and back-end development. Proficient in database management, I also created engaging user interfaces for interactive experiences.
